INDUSTRY FIRST Amazing Animated Ordering

THE FREE ENTERPRISE GRADE ORDER PAY APP FOR IN ROOM DINING POOLSIDE AND RESTAURANTS

Two way integration with Oracle Simphony & Opera enables guests to pay by card or charge to room.

Reduce front of house staffing needs by upto 40%

Increase average check size by 15%

Boost the sale of higher margin menu items

# FREE FOR LIFE

The TableRes order pay app is free of charge for larger hotels, resorts and chains when using the built in payment gateway.

### AMAZING ANIMATED ORDERING

The TableRes app includes an industry first – stunning animated ordering. Animation brings more guest engagement, enhanced interaction and no small measure of fun. We call it serious fun, because animated menu items, are much more likely to be ordered than non-animated. This allows us to selectively nudge guests towards higher margin items, boosting profitability.

### TWO WAY, READ WRITE INTEGRATION

The TableRes app is specifically designed for hotels with many different F&B outlets. It can be used for in room dining, at restaurants of every type, in bars, cafes and poolside. The app has an authorised integration with Oracle Simphony POS and Opera PMS that allows guest to charge to room or pay with a debit or credit card. Updates to a menu are automatically pulled through and are reflected in the app within minutes.

### QUICK AND SIMPLE IN-APP PAYMENTS

Up until now setting up payments, for an onproperty order pay app, has been a long and sometimes painful process. We have eliminated that headache by preinstalling an industry standard payment gateway that just works out of the box. We have a decade of experience working on payment solutions with large hotels running Oracle Simphony and Opera. This enables us to deploy our app and have card payment and charge to room up and running in a matter of hours.

## OUR APP, YOUR WAY

The TableRes app can be delivered as a, no download needed, web app where the guest just scans a QR code on the restaurant table, poolside cabana or in the sleeping room for in room dining. Alternatively, we can provide a native iOS and Android version should you need it. Finally, we can also deliver a progressive web app (PWA) which some consider the best of both worlds.

The Symphony integrated TableRes App is currently available free of charge to larger hotels and chains. Ask your Evalon account manager or contact us direct.
